CCGS President's Letter

Greetings to All

Spring is upon us. The mild winter did not help prices for natural gas. Oil seems to be holding up.

I would like to take the time this month to discuss leadership. Your society needs you to step up and volunteer and take the lead. Leaders do more than preside over a position, they hopefully come up with new or unique ways to approach the challenges we will face in the future. Working in geology and its many different branches, we at the CCGS have a very diverse group. Our group has experience and youth. Together we have an interesting portfolio of potential. You are challenged daily and utilize your integrity and leadership qualities. OK, I will get off my soapbox.

Our last couple of talks leaned very heavilyon computing power. These talks seemed to also point out that AI will not replace the mind of anyone in our profession. One of our future talks will feature Dan Pedrotti. This man has lead companies and our society. I am very excited about this talk in May.

April will be a busy month. The CCGS will award scholarships to deserving students, A total solar eclipse, and GEOGULF in San Antonio. We also will be awarding "Honorary Life Member" status to a very deserving individual.

SIPES is holding their national convention in Corpus Christi June 10-12. Sponsorships and advertising space is available. Prices range from \$60 to \$4000. Contact Zac Corcoran for information (361)658-5850.

It is an honor for me to be president. Thank you to those who volunteered to fill openings on the scholarship committee. PLEASE consider a few hours of volunteering. Besides doing a good thing, it looks good on that resume.

Remember our society depends on YOU.

Dennis O. Moore

President CCGS 2023-24

The Houston Geological Society wants to hear your story!

HGS members are interested to hear what's new and notable in exploration and production from your region: new play or prospect ideas? Successes or learning opportunities?

Don't miss an opportunity to have your story published in the HGS Bulletin. You can write your own technical article or give an interview to the Editor.

Contact <u>editor@hgs.org</u> for more information

REGISTRATION IS OPEN!!!

GeoGulf in San Antonio, Texas April 10-12, 2024

The week of the TOTAL April 8 Eclipse

A conference of the **Gulf Coast Association of Geological Societies**

All current information at www.geogulf2024.org

Everything Gulf Coast: Oil/Gas/Conventions & Unconventionals/Industry & Research/Environments, Landscapes, Water Resources, Sequestration, and more. **Our Premiere Gulf Coast Conference.**

Presentations & Posters
Vendor & Employer Exhibitors and Sponsors

See you in San Antonio

The Society of Petroleum Engineers – Gulf Coast Section (SPE-GCS) is pleased to inform you that it is organizing the **14th** semi-annual Energy Professionals Hiring Event for professionals of energy and upstream oil & gas disciplines. The Spring 2024 Hiring Event will be held face-to-face on **May 9, 2024**, at the Offshore Technology Conference (OTC) in Houston. **We are inviting CCGS to join as a collaborating professional society.** Thanks for participating as a collaborating society in Fall 2023. There is no charge to collaborate; we just ask that you communicate the news about the event to your members and their associated employers. In return, your professional current members will be entitled to participate as job seekers.

- The Hiring Event is one of the most remarkable happenings that bring together experienced and talented professionals with energy industry employers and recruiters from various sectors, thereby serving as the platform for open and vastranging employment opportunities.
- Experienced energy professionals who are members of one of the collaborating organizations can participate in both events as jobseekers by registering in advance. For more information about the event, location, time, registration, and participants, visit our website: https://www.spegcs.org/hiring-event/.
- Registration for employers is open: https://www.spegcs.org/events/6825/

Please reply with your intent to participate as a collaborating organization. You're invited to attend a virtual meeting for volunteers on Feb. 21: https://www.spegcs.org/events/6845/

CBGS Presentations

Dr. Amir Ismail, a postdoc working with Dr. Mohamed Ahmed at TAMU-CC is presenting his latest research titled "Integration of Machine Learning and Seismic Attributes for Improving Subsurface Interpretation in Hydrocarbon Exploration" at the April 2024 CBGS/CCGS professional luncheon.

CBGS Business

• CBGS currently has 28 active members, 2 honorary members, and 40 student members.

Academic Programs and Research Activities at TAMU-CC and TAMUK

- TAMU-CC faculty R. Coffin and I. Pecher are leading researcher on a project composed of a 4-university team conducting Earth carbon cycling with a focus on polar warming in the Ross Sea, Antarctica. Collaborative universities include University of Texas, Dauphin Island, and University of West Florida. For additional info, contact Dr. Richard Coffin: Richard.Coffin@tamucc.edu at TAMU-CC.
- TAMU-CC faculty L. Prothro is currently participating in a two-month research cruse in Antarctica.
- TAMU-CC's geology program recently underwent an external evaluation. For additional information contact Dr. Valeriu Murgulet (<u>Valeriu.Murgulet@tamucc.edu</u>) at TAMU-CC.
- TAMU-CC's geology curriculum is constantly being refreshed with new courses but this academic year we are looking to add additional tracks such as Marine and Climate Geosciences, Planetary Geosciences and Biogeosciences. For additional information contact Dr. Valeriu Murgulet (Valeriu.Murgulet@tamucc.edu) at TAMU-CC.
- Five graduate students from the TAMU-CC Geophysics Lab will be presenting their recent research at the 2023 AGU meeting. For details, contact Dr. Mohamed Ahmed at Mohamed.ahmed@tamucc.edu.
- Dr. Mohamed Ahmed at TAMU-CC extended an invitation to Mr. Randy Bissell to deliver a
 presentation in Ahmed's geophysics class. Mr. Bissell's presentation focused on "The Concept of
 Stratigraphic Correlation Applying Imagination: Understanding and Expanding the Perception of
 Extensive Geological Information with Limited Data."
- In the Fall of 2023, the Department of Physics and Geosciences at TAMUK was pleased to host Dr. Matthew Loocke, director of the Chevron Geomaterials Characterization Laboratory at Louisiana State University. Dr. Loocke presented on research activities in his group and insights on the development of courses for geology undergraduates. Dr. Loocke's mineralogy class joined TAMUK and Del Mar Community college in the October 2023 field trip to Central Texas where students learned about magmatic processes and significant ore body mineralization.
- In early November, students from the Geology Club (TAMUK Association of Geosciences) hosted Randy Bissel from the CCGS on a very entertaining and informative lecture about sea level changes and the impact on coastal landscapes.

• TAMUK is pleased to announce that we had 15 graduating seniors at the end of the 2023 academic year in the Bachelor of Science in Geology program. The majority of those students also obtained their GIS certification, and at least 5 of them are working on their drone pilot license. They were very dedicated students. All are currently employed and 2 of the 15 went on to the University of Texas – San Antonio for graduate studies.

Student News:

- Ramadan Abdelrehim at TAMU-CC won first place for the second consecutive year in the 2024 Invent for The Planet Competition.
- Ramadan Abdelrehim, Mohamed Abdrabou, and Alan Innes have confirmed their acceptance to present abstracts at the SAGEEP 2024 meeting.
 - o Innes, A., Ahmed, M., 2024, Assessing Effectiveness of Modern Smartphone Magnetometers in Mapping Buried Utilities: Symposium on the Application of Geophysics to Engineering and Environmental Problems (SAGEEP), Tucson, AZ, March 2024.
 - Abdelrehim, R., Ahmed, M., 2024, Characterization of Freshwater Lens on Barrier Islands
 Using Time Domain Electromagnetic Survey: A Case Study from Padre Island, Texas,
 USA: Symposium on the Application of Geophysics to Engineering and Environmental
 Problems (SAGEEP), Tucson, AZ, March 2024.
 - Abdrabou, M., Ahmed, M., 2024, Structural Characteristics of the Complex Gulf of Suez Rift-Related Basins: Insights from Passive Seismic and Gravity Surveys: Symposium on the Application of Geophysics to Engineering and Environmental Problems (SAGEEP), Tucson, AZ, March 2024.
- Dr. Mohamed Ahmed and his students at TAMU-CC co-authored an article titled "Impacts of the Grand Ethiopian Renaissance Dam on the Nile River's Downstream Reservoirs," published in the Journal of Hydrology 2024.
- Ahmed Omar at TAMU-CC has an abstract accepted for presentation at the TAMUCC Symposium for Student Innovation, Research, and Creative Activities on April 26, 2024.
- Petrophysics student Taiwo Osunrinde (presenter) and Dr. Subbarao Yelisetti and Dr. Veronica Sanchez at TAMUK co-authored an abstract for a poster presentation at IMAGE in August 2023 in Houston. The work dealt with CO2 storage evaluation.
- In November 2023 Taiwo Osunrinde and Dr. Subbarao Yelisetti and Dr. Veronica Sanchez at TAMUK published research in *The Leading Edge* focusing on the significance of understanding and evaluating the depositional environment of CO2 long-term storage sites (The Leading Edge, vol. 42, issue 11, pp. 737-747).
- In December, Dr. Sanchez and undergraduate geology major, Cathy Downs, presented a poster at the annual American Geophysical Union (AGU) which focused on reconstructing the (complex) history of Grenville rocks from central Texas using geochemical data.

Meetings & Events

SPONSORS

Nueces Energy, Inc.

P.O. Box 252 Corpus Christi, Texas 78403 Office: (361) 884-0435 Fax: (361)-654-1436

www.nuecesland.com

Nueces Energy, Inc. is a complete land services company in the business of providing professional landmen and project management to various energy related jobs primarily in the oil and gas industry.

With over 30 years of industry experience, we specialize in determining surface and subsurface ownership and negotiating and acquiring contracts, rights of way agreements, and easements to provide our clients with the legal right to explore and develop oil and gas resources. We provide a full service land company capable of managing any project no matter how large or small.

CORPUS CHRISTI GEOLOGICAL SOCIETY COASTAL BEND GEOPHYSICAL SOCIETY

ANNOUNCEMENT

April 17th, 2024

Location: Joe's Crab Shack, 444 North Shoreline Dr.,

Corpus Christi, TX 78401

Student Sponsors: Viper Exploration, Imagine Resources,

Mary DeMis. Thank you!

Time: 11:30 AM Social, Lunch follows at 11:45 AM,

Speaker at 12:00 PM

Cost: \$35.00 (additional \$10.00 surcharge without

reservation: NO SHOW may be billed.)

Reservations: Please RSVP by 11:00 AM on Monday, April 15th

before the meeting!

Email: arrangements@ccgeo.org

Please note that luncheon RSVPs are a commitment to Joe's Crab Shack (Shoreline Drive) and must be paid even if you can't attend the luncheon.

SPONSORSHIP OPPORTUNITIES ARE AVAILABLE! IF YOU WOULD LIKE TO SPONSOR, PLEASE CONTACT US AT:

arrangements@ccgeo.org

Integration of Machine Learning and Seismic Attributes for Improving Subsurface Interpretation in Hydrocarbon Exploration

Amir Ismail^{1,2}

This talk focuses on the application of machine learning to 2D and 3D seismic data analysis. Case studies from the offshore Nile Delta of Egypt and New Zealand show how supervised and unsupervised learning can be used with optimally chosen attributes to build a 3D structural model, gas chimneys, small-scale faults, gas channel detection, and better identification and classification of subtle stratigraphic features. The work also highlights the importance of using ML techniques and multi-attribute analysis as a powerful reservoir description tool to show reservoir distribution and heterogeneity within the channel geometry.

Keyword: Self-organizing maps; seismic attributes; principal component analysis; unsupervised machine learning; supervised machine learning.

BIOGRAPHY

Ismail received a B.Sc. (2007) in geophysics and seismology from Helwan University, Egypt. His M.Sc. (2014) and Ph.D. (2020) from Helwan University, Egypt focused on seismic data processing, seismic stratigraphy, attributes, rock physics, inversion, and machine learning, offshore Nile Delta, Egypt. He was a part of the research team in Università di Napoli Federico II, Department of Physics "Ettore Pancini", Italy for two years (2018-2020). He awarded a research fellowship for six months (2021-2022) from which he has more involved in seismic imaging of the Solfatara crater (Campi Flegrei caldera, southern Italy) project to detect evidence of the fluid's migration

pathways in the shallow structures. Recently, he has received a Fulbright scholarship, and he is currently working in the Geophysics Lab with Dr. Mohamed Ahmed at the Department of Physical and Environmental Sciences, Texas A&M University—Corpus Christi. He is an active member of the EAGE and AAPG and still affiliated with Helwan University, Egypt as a lecturer of Geophysics.

60 Years of an Independent Geologist

Daniel A. Pedrotti

Dan received his bachelor of Science Degree in Geology from Texas A & M University in May 1953. He spent three years as a Jet Fighter Pilot in the United States Air Force then went back to A&M where he earned a Master of Science Degree in Geology in 1958. He was hired in February by The Texas Company (Texaco) to work as an exploration geologist in the Corpus Christi District Office.

In September 1965 rather than take a transfer to Houston Dan went Independent. He teamed up with a geologist, Bill Miller and several landmen where he discovered a number of small producers; a one-million-barrel Oil field; turned the acreage that led to the discovery of the 100 Bcf El Gato gas field; and through company partnerships participated in several fifty plus Bcf discoveries.

He was a partner in the acquisition of the First State Bank from Clint Murchison and served on the boards of three different banks. He and partner, Bill Miller assembled and purchased two full city blocks and with partners promoted the development of One Shoreline Plaza a two tower 28 story premier office building and the upscale Hershey Hotel now known as the Omni Bayfront.

They joined the Mormac group in the acquisition of Bagget Drilling company to form the five rig Cinco Drilling Company, later sold to Delhi International in exchange for company stock.

He along with his geologist partner, Bill Miller incorporated Suemaur Corporation and Suemaur Exploration, and developed a number of small oil discoveries. In 1990 he with partner Bill Miller and another independent, J M Smith, acquired the Exploration assets of Harkins Drilling Company, hired the management team along with the exploration staff and created the Suemaur Exploration and Production Company. This Company based on the "Exploration Cooperative Concept" became very successful and a major player among small independents.

He also joined as a venture partner in LMP Petroleum Exploration, his son, Mike's company where several very commercial oil and gas fields were developed.

In 2,000, believing that natural gas prices would not rally he sold out his interest in Suemaur, but due to residual interests in prospects developed while still a partner he continues to participate in a number of successful discoveries.

Carl D Musgrove December 15, 1932 — December 26, 2023

Carl D Musgrove, a beloved husband, father, grandfather, and respected geologist, passed away December 26, 2023, in Corpus Christi at the age of 91. Born on December 15, 1932, in Paden, Oklahoma, Carl lived a full life with passion for his profession and love for nature.

Following his patriotic spirit and sense of duty, Carl served his country as a veteran in the United States Army from 1953 to 1955. After his honorable discharge, he pursued his academic endeavors and earned a master's degree in Geology from the University of Oklahoma in 1963. With his thirst for knowledge and dedication to his field, he embarked on a fulfilling career that spanned several decades.

For thirty years, Carl worked as a geologist for Exxon Company USA. His expertise and commitment to excellence earned him great respect among his colleagues. Afterward, he became an independent consulting geologist and provided invaluable insights to numerous organizations until June 2020. His contributions were instrumental in shaping the landscape of the geological field.

Outside of work, Carl had a profound appreciation for nature's beauty. As a nature lover at heart, he delighted in spending time outdoors engaging in activities such as hunting and fishing. These moments brought him joy and tranquility while allowing him to connect with the natural world he held dear.

On January 8, 2024, family and friends will gather to pay their final respects to Carl at the Coastal Bend State Veterans Cemetery in Corpus Christi. The graveside service will commence at 1:00 PM local time.

Carl held a special place in the hearts of those who knew him personally. He is survived by his loving wife Billie Ruth Musgrove, who supported him throughout their journey together. Together they built a beautiful family that brought joy into their lives.

He is also survived by his daughters, Carol (Marty) Evans and Patti (Stan) Soles, who will always cherish the memories they shared with their father. Carl's grandchildren, Jeff Evans, Kelly Dean, Pam McLeod, and Melanie Liu brought him immense pride and joy. Additionally, he leaves behind ten great-grandchildren who will carry his legacy forward.

The loss of Carl D Musgrove is deeply felt by all those fortunate enough to have known him. Carl's memory will forever be treasured in the hearts of his loved ones as they find solace in the legacy he leaves behind.

PHILIP LAURANCE DAVIDSON OBITUARY

Philip Laurance Davidson went to be with his Lord and Savior on Friday, January 5, 2024. He joined parents, Harold and Mabel Davidson; Brother, Richard Davidson; Sis, Frances Davidson Mayfield; grandson, Tyler Davidson; and wife, Dorothy Van Gerpen Davidson.

He is survived by his children: daughter, Susan Ann (Barbara Liedloff) Davidson; sons, Steven Laurance (Lisa) Davidson and Thomas Paul (Andrea) Davidson; grandchildren, Christi Davidson (Landon) Gibbs, Carri Davidson (Joseph) Mecca, Cameron (Heather) Davidson Stephanie Davidson (Michael) Cartwright and Eric (Kasey) Davidson Stephanie Davidson (Michael) Cartwright and Eric (Kasey) Davidson; and great grandchildren, Emma, Tyler, Jack, Jace, Elliot, Caroline, Katy, Pierce, Camille, Peyton and Avery.

Phil was born in Hardy, Nebraska on July 2, 1932. He attended Superior High School in Superior, Nebraska where he was quarterback for the town's first undefeated State Football Champions team of 1949. After graduating from Superior High School in 1950, Phil attended Midland College on football and academic scholarships where he met his wife, Dorothy, at a school dance. They were married on January 29, 1953 at First Baptist Church in Fremont, Nebraska.

Phil transferred to the University of Nebraska, where he was a member of the Sigma Chi fraternity, and received his Bachelors of Science degree in Geology in 1956. Upon graduation, Phil and Dorothy moved the Midland, Texas where he took a job as a petroleum geologist with Texaco. He joined Cosden Petroleum in 1960, moving his family to Corpus Christi, Texas. He became an independent geologist in 1963.

Phil and Dorothy were both active volunteers and supporters of both the Corpus Christi and Horseshoe Bay, Texas communities. They were long-running members of First Baptist Church of Corpus Christi, and founding member of the Church at Horseshoe Bay. Phil was a faithful, life-long testament to Luke 12:48; a humble steward, always helping others.

Phil received many academic, professional, and community achievements throughout his life; but if you asked him what his singular, greatest achievement was, he would answer his family. He was a loving father and doting grandfather and great-grandfather. His hobbies often mirrored his children's passions; from coaching Little League teams, or competing in MORF sailing races in the Gulf of Mexico, to spending time with family and friends on the golf course. He was a life-long learner, lover of history, and an active reader. He loved to fly and became an Instrument Rated pilot. His final days were spent reading through nearly an entire dictionary, writing down words he thought his great-grandchildren should learn.

William Payne Obituary

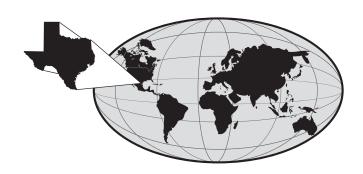

William Ross Payne, age 90, devoted husband and father, went to be with his Lord and Savior December 26, 2023, in <u>Seguin, Texas</u>. Bill's life was guided by the things he learned at an early age from his faithful mother. She taught him about the love of Jesus Christ and how He laid down His life as a sacrifice for mankind's sins.

Bill received a B.A. in Geology from Baylor University in 1955. After serving several years as a 2nd Lieutenant in the Air Force as a Navigational Instructor, he returned to Baylor to receive a M.A. in 1960. He began his career in 1960 as a geologist with the Bureau of Economic Geology in <u>Austin, Texas</u>, where he worked on a High Calcium Limestone Project. He was employed by Texaco, Inc. in 1961 in <u>Corpus Christi, Texas</u>, then with Southland Royalty Company, and became an independent geologist in 1972.

Bill was deacon of Grace Bible Church and Corpus Christi Bible Church. He was a member of Corpus Christi Geological Society, Gulf Coast Geological Society and American Association of Petroleum Geology. He enjoyed gardening, was a Master Gardener and member of South Texas Botanical Gardens, and YMCA of the Coastal Bend.

He is survived by his wife of 68 years, Deanna Stephens Payne, daughter Sharon Payne Franklin and her husband Anthony Morgan Franklin, grandson Joseph Travis Franklin and wife Kirby Gillespie Franklin, daughter Kristen Payne Lyons and her husband Christopher Edward Lyons and stepson Connor Patrick Lyons, daughter Kerrie Payne Olsen and her husband Eric Robert Olsen. He is predeceased by his parents William Douthitt Payne and Norma Broyles Payne, son Stephen Ross Payne, and grandson Anthony Ross Franklin.

The Balcones Igneous Province of South Central Texas: Revisions To The Age Of Volcanism and Suggestions For An Emplacement Mechanism

Mark E. Thompson Geologist

San Antonio, Texas

PRESENTATION ABSTRACT

Exposures of Cretaceous alkalic igneous rocks along the northern margin of the Texas Gulf Coast have been well documented since the earliest geological surveys of Texas. Intrusive exposures extend southward into the subsurface where igneous deposits become characterized by extrusive volcanic tuff mounds. All igneous deposits, both intrusive and extrusive are collectively known as the Balcones Igneous Province (BIP). The general geology of the BIP rocks is discussed along with a description of their composition which is dominated by ultramafic classifications.

Data obtained on the subsurface portion of the BIP from an active, ongoing oil and gas exploration program is used to prepare a series of detailed stratigraphic cross sections which permit dating of the volcanic events by stratigraphic methods. Volcanic eruptions in the BIP are documented to have commenced significantly earlier in the Cretaceous and to occur over a much longer duration of 24 Ma (late Cenomanian to early Maastrichtian) than the 8 Ma duration from age dates (late Santonian to Mid Campanian) offered by recently published geochronology studies. This revised age range for the BIP expands the time frame for BIP emplacement which has implications on geologic interpretations of Late Cretaceous plate movements in the northern Gulf of Mexico.

The tectonic history of south-central Texas is described and the relationship between the BIP and the Mesoproterozoic Llano Front, the late Paleozoic Ouachita Orogenic Front, and the early Mesozoic opening of the Gulf of Mexico is discussed.

Petrogenesis of the BIP requires eruption at the surface of deep-seated ultramafic magmatism on a passive continental plate margin with no evidence for the involvement of either subduction nor a "hot spot" thermal plume A suggestion is offered for an edge convection mechanism that satisfies this requirement.

BIOGRAPHY

Mark was born and raised in a very small dairy farming town in south-central Wisconsin. He attended the University of Wisconsin at Oshkosh where he received a Bachelor of Science degree in Geology and he then enrolled in graduate school at the University of Wisconsin at Milwaukee where he earned the Master of Science degree in Geology.

He has a 46-year career as a professional geologist which began in the mining industry in the Lake Superior area and continued in the oil and gas business in Texas. His years in Dallas, Houston and then in San Antonio involved employment by both large and small companies and also time spent on his own as an independent petroleum geologist. Mark owns Bastrop Energy Group, a San Antonio based exploration and production company, and in addition to operating oil properties he originates, leases and sells drill prospects in central Texas.

Mark is an active member of the South Texas Geological Society, AAPG, GSA and he has published numerous articles on the geology of south-central Texas. Mark and Jane, his wife of 44 years, have 2 children and 4 grandchildren.

Units of all ranks are in the process of being defined by Global Boundary Stratbyps Section and Points (GSSP) for their lover boundaries, including those of the Archean and Proterozoic, long defined by Global Standard Stratigraphic Ages (GSSA). Italic fonts indicate informal units and placeholdes for unramed units. Versioned charts and detailed information on ratfled GSSPs are available at the website http://www.stratgraphy.org. The URL to this chart is found below.

Numerical ages are subject to revision and do not define units in the Phanerozoic and the Ediacaran; only GSSPs do. For boundaries in the Phanerozoic without ratified GSSPs or without constrained numerical ages, an approximate numerical age (~) is provided.

Ratified Subseries/Subepochs are abbreviated as UfL (Upper/Late), M (Middle) and LiE (Lower/Early), Numerical ages for all systems except Quaternary, upper Paleogene, Cretaceous, Triassic, Permian and Precambrian are taken from 'A Geologic Time Scale 2012 by Gradstein et al. (2012), those for the Quaternary, upper Paleogene, Cretaceous, Triassic, Permian and Precambrian were provided by the relevant ICS subcommissions.

BOWEN'S REACTION SERIES

N.L. Bowen, 1922

CHARACTERISTICS OF WORLD WIDE OCCURRENCES OF ULTRAMAFIC ROCKS

Formed as large differentiated and layered plutonic intrusions

Old. Almost exclusively Archean & Proterozoic

Phanerozoic ultramafics are rare other than subduction zone ophiolites

Volcanic ultramafics very rare

Ultramafics are thought to originate in the Mantle or Asthenosphere, which requires a Subduction Zone or Mantle "Hot Spot" Thermal Plume To Transport Magma Upward.

SUMMARY OF BIP ROCK CHARACTERISTICS

The Individual Eruptions are small - only 1/4 mile to 2 miles in diameter covering 100 to 3000 acres

The Total Amount of Magma Involved in the Entire BIP is small, insufficient for significant magmatic differentiation.

The Ultramafics are high in Mg (8-18%) and high in Ni (150-600 ppm) due to low Olivine crystallization content. This suggests a primary melt.

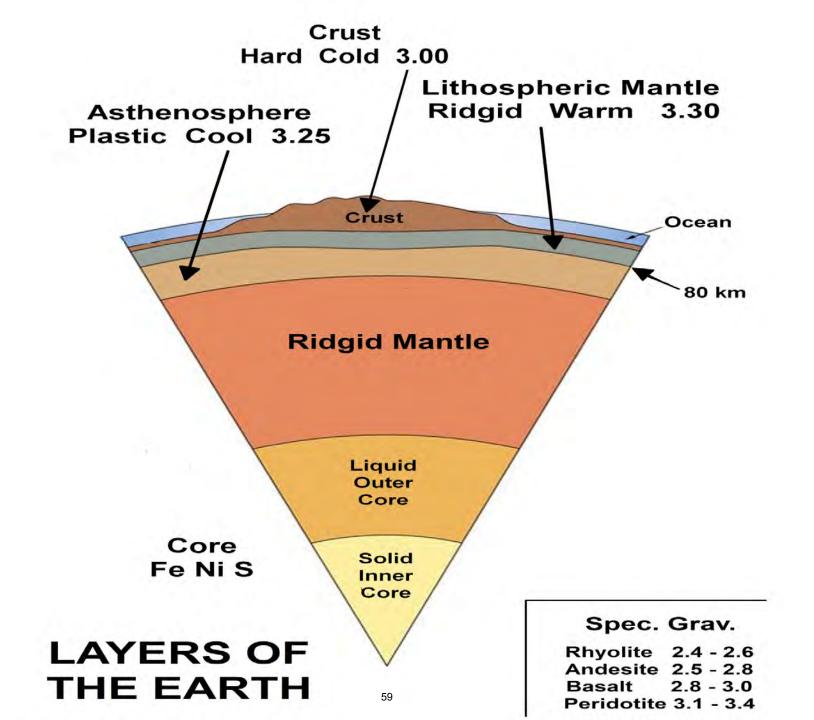

Sr 87 - Sr 86 ratios are 0.70313 to 0.70369 which are characteristic of mantle origin and no crustal mixing.

The Phonolites contain low Mg and Ni content, are high in Rb and Zr, and are younger than the ultramafics. This suggests they are derived from the Nephelinite Magma by fractional crystallization.

BIP rocks contain ultramafic Xenoliths of Spinel Peridotite, Dunite and Harzburgite suggesting a Mantle Soutce.

All Indications are that Bowen's Reaction Series
Never Even Got Started.

Computer Modeling Indicates That Compositions present in the BIP can be formed by an enriched Asthenospheric Source undergoing 5-10% partial melting at a depth of 80-100 km.

The Formation And Emplacement of the BIP

The Origin of the BIP Magma was the Asthenosphere.

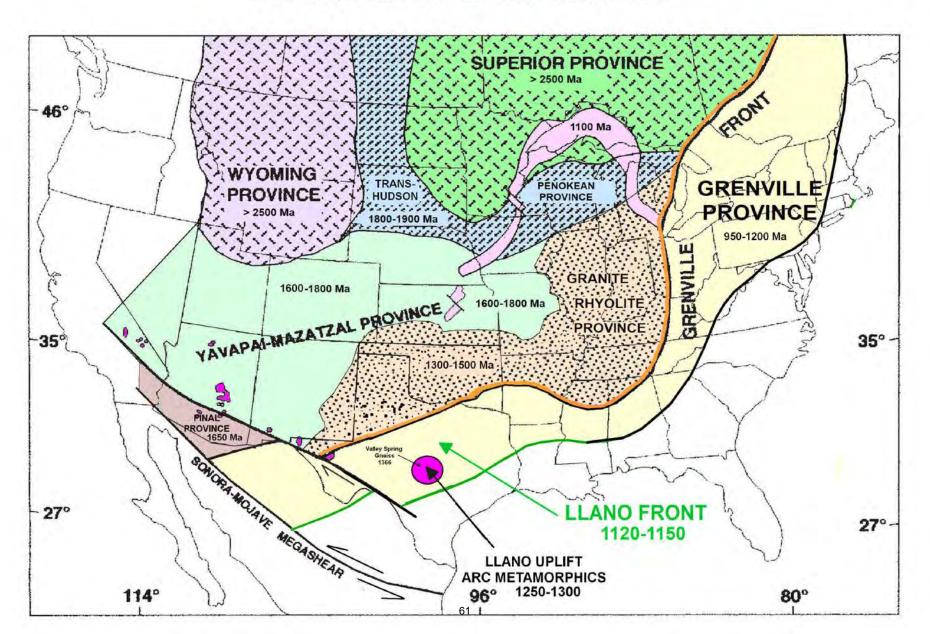

This requires a pathway for rapid upward movement of ultramafic magma from asthenosphere, but pathway must restrict total magma volume to only allow partial melting which limits formation of common basalts.

No evidence exists for crustal subduction or any type of "hot spot" thermal plume.

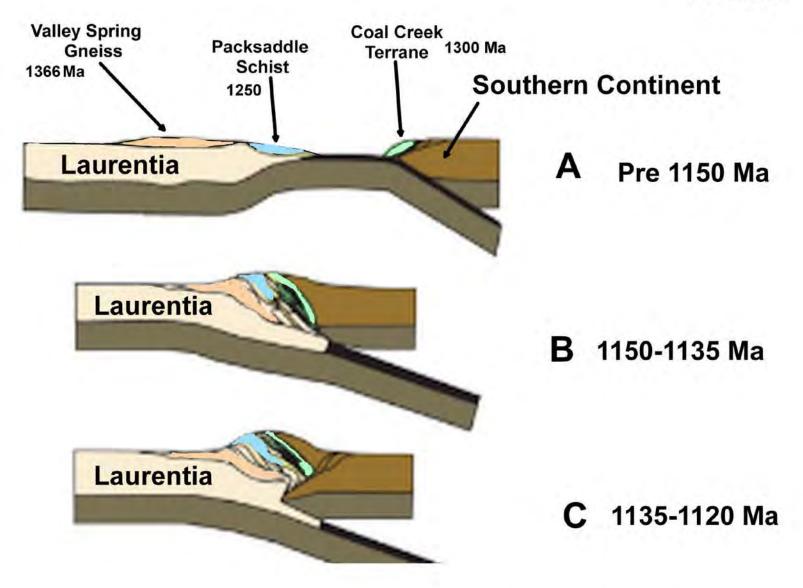

During the entire Cretaceous this area of south central Texas was a passive plate margin located on the north side of the newly formed Gult of Mexico Basin.

EDGE DRIVE CONVECTION THERMAL MODEL Adiabatic Heat Exchange Process With No Mantle Heat Plume or Heat Anomaly

Requires Juxtaposition of Cratonic & Oceanic Lithosphere

Requires Lithospheric Extension As Conduit For Low-scale Decompression Melting

KNIPPA QUARRY XENOLITHS

BIP Olivine Nephilinite Ultramafic host rock contains Xenoliths of coarse grained Peridotite, Dunite and Harzburgite.

These Xenoliths have mineral chemistries of a subcontinental Lithospheric Mantle too cool for Asthenospheric Mantle.

Within the Knippa Quarry Xenoliths are Xenocrystic Zircons which yield an age date of 558 to 982 Ma.

The Geophysical Anomaly under and south of the BIP likely represents Crustal Accretion Terraine derived from Gondwana during the Ouachita Orogenic Event.

Geology of the Big Bend National Park, Texas, by C. A. Berkebile. 26 p., 1984. CCGS 112G \$12.00

GEO LINK POST

http://www.lib.utexas.edu/books/landsapes/index.php
Free service. Rare, fragile, hard-to-find, public domain documents covering various topics about the landscape of Texas.
Includes the Texas Geological Survey from 1887 until 1894.

USGS TAPESTRY OF TIME AND TERRAIN http://tapestry.usgs.gov The CCGS is donating to all of the 5th and 6th grade schools in the Coastal Bend. Check it out--it is a spectacular map. You might want to frame one for your own office. The one in my office has glass and a metal frame, and It cost \$400 and it does not look as good as the ones we are giving to the schools.

FREE TEXAS TOPOS'S http://www.tnris.state.tx.us/digital.htm these are TIFF files from your state government that can be downloaded and printed. You can ad them to SMT by converting them first in Globalmapper. Other digital data as well.

FREE NATIONAL TOPO'S http://store.usgs.gov/b2c_usgs/b2c/start/
(xcm=r3standardpitrex_prd)/.do go to this webpage and look on the extreme right side to the box titled TOPO MAPS DOWNLOAD TOPO MAPS FREE.

http://www.geographynetwork.com/ Go here and try their top 5 map services. My favorite is 'USGS Elevation Date.' Zoom in on your favorite places and see great shaded relief images. One of my favorites is the Great Sand Dunes National Park in south central Colorado. Nice Dunes.

http://antwrp.gsfc.nasa.gov/apod/asropix.html Astronomy picture of the day--awesome. I click this page everyday.

http://www.spacimaging.com/gallery/ioweek/iow.htm Amazing satellite images. Check out the gallery.

http://www.ngdc.noaa.gov/seg/topo/globegal.shtml More great maps to share with kids and students.

www.ccgeo.org Don't forget we have our own we page.

http://terra.nasa.gov/gallery/ Great satellite images of Earth.

<u>www.ermaper.com</u> They have a great free downloadable viewer for TIFF and other graphic files called ER Viewer.

http://terrasrver.com Go here to download free aerial photo images that can be plotted under your digital land and well data. Images down to 1 meter resolution, searchable by Lat Long coordinate. Useful for resolving well location questions.
